 **Scalable Production**- Capacity for half a million metres monthly.

 **Quality Control**- Stringent management practices for quality.

Production Capabilities

 Fabric cutting & processing

 Custom dyeing services

 Multi-layer fabrication

Our Process

Why NexGen?

Global Reach

Premium Quality

Technical Expertise

Custom Solutions

Fast Delivery

Trusted by Industry Leaders

Large Manufacturing Capacity

Founder's Message

Praveen Jain
Founder

An affection towards making fabrics has begun a new chapter in my life and the journey was very aspiring. There's a whole story behind the NexGen, which incorporates a gesture to the previous, a preview to the future with an even undeniable trend! NexGen has always been an imagination for me that is standing in front of me in the form of reality. It all became possible because of the support of my people. From the beginning to till now, we never stand still. We're discovers and designers, deciphering patterns and tides, getting shading, planning and assembling materials that fit a second in time, and stand the test of time.

What started with fabrics has now grown beyond fabrics. Today, NexGen offers a one-stop solution for fabrics, carpets, flooring and acoustics. In carpets and flooring, we have carpet tiles, broadloom carpets and vinyl flooring, while our acoustics range covers all types of acoustical products for different spaces and requirements.

We have shown our expertise goes from farm to fabric and we handle everything in between. We're global yet local as we also believe in vocals for local. Our team is dedicated to making NexGen the natural choice for fabric, flooring, carpet and acoustic solutions worldwide.

My love for making fabrics will keep going on with a simple thought: Customer Delight, Employee Delight & Supplier Delight.

This journey is not only mine, it's a journey of all those people who have trusted me.
